SAFETY DATA SHEET

CHEMICAL IDENTIFICATION
Catalogue Number: A-155
Product Name: Amitriptyline hydrochloride

COMPOSITION/INFORMATION ON INGREDIENTS
CAS No.: 549-18-8
Molecular Formula: C_{20}H_{24}ClN
Molecular Weight: 313.86

HAZARDS IDENTIFICATION
Classification according to Regulation (EC) No 1272/2008:
Acute toxicity, Oral (Category 3), H301, Toxic if swallowed. IF SWALLOWED: Immediately call a POISON CENTER/doctor.
Eye irritation (Category 2), H319, Causes serious eye irritation.
Reproductive toxicity (Category 2), H361d, Suspected of damaging the unborn child.
Aquatic hazard, Acute & Chronic (Category 1), H410, Very toxic to aquatic life with long lasting effects.

FIRST AID MEASURES
In all cases of exposure, obtain medical advice.
Inhalation: Remove to fresh air and monitor breathing. If breathing becomes difficult give oxygen. If breathing stops give artificial respiration.
Skin Contact: Wash off immediately with plenty of water while removing all contaminated clothing. Wash clothing before reuse.
Eye Contact: Hold eyelids apart and flush eyes with plenty of water.
Ingestion: Rinse mouth with plenty of water. Do NOT induce vomiting unless directed to do so by medical personnel. Never give anything by mouth to an unconscious person.

FIRE FIGHTING MEASURES
Suitable Extinguishing Media: Use water spray, alcohol-resistant foam, dry chemical or carbon dioxide.
Special Hazards: Thermal decomposition can lead to release of toxic and corrosive gases/vapors.
Special Fire-fighting Procedures: Wear self-contained breathing apparatus for firefighting and protective clothing to prevent contact with skin and eyes.

ACCIDENTAL RELEASE MEASURES
Personal precautions: Do not take action without suitable protective clothing. Evacuate personnel to safe areas. Ensure adequate ventilation. Avoid dust formation. Avoid breathing vapors, mist or gas.
Environmental Precautions: Prevent further leakage or spillage if safe to do so. Do not let product enter drains. Discharge into the environment must be avoided.
Clean-up methods: Contain spill and collect, as appropriate. Transfer to a chemical waste container for disposal in accordance with local regulations.

HANDLING AND STORAGE
Storage: Keep container tightly closed. Keep container in a cool, well-ventilated area. Do not store above -20ºC (-4ºF).
Handling: Keep away from heat. Keep away from source of ignition. Empty containers pose a fire risk, evaporate the residue under a fume hood. Avoid contact with skin. Wear suitable protective clothing. In case of insufficient ventilation, wear suitable respiratory equipment. If ingested, seek medical advice immediately and show the container or the label.

EXPOSURE CONTROLS / PERSONAL PROTECTION
Control Parameters: National occupational exposure limits.
Engineering controls: Ensure adequate ventilation, especially in confined areas. Use in a fume hood where applicable. Ensure laboratory is equipped with a safety shower and eye wash station. General industrial hygiene practice. Avoid contact with skin, eyes and clothing. Wash hands before breaks and immediately after handling the product.

Personal protective equipment:
Eye/face: Safety goggles.
Skin: Chemical resistant gloves. Wash and dry hands thoroughly after handling.
Body: Wear appropriate protective clothing. Remove and wash contaminated clothing before re-use.
Respiratory protection: NIOSH approved respirator, as conditions warrant.

PHYSICAL AND CHEMICAL PROPERTIES
Physical state: Solid.
Density: Not available.
Flash point: Not available.
Explosive properties: Not available.
Solubility: DMSO.

STABILITY AND REACTIVITY
Stability: Stable under normal conditions.
Conditions to Avoid: Not available.
Incompatible materials: Strong oxidising agents.
Hazardous Combustion or Decomposition Products: May emit toxic gases upon thermal decomposition. Carbon oxides, Nitrogen oxides (NOx), Hydrogen chloride gas.

TOXICOLOGICAL INFORMATION
May be harmful if inhaled, swallowed or absorbed through skin. May cause eye irritation. To the best of our knowledge, the chemical, physical and toxicological properties have not been thoroughly investigated.

ECOLOGICAL INFORMATION
Toxicity to fish: LC50 - Oncorhynchus mykiss (rainbow trout) – 0.25 mg/l - 96 h (OECD Test Guideline 203).
Toxicity to daphnia and other aquatic invertebrates: EC50 - Daphnia magna (Water flea) – 0.39 mg/l - 24 h.
Toxicity to algae: ErC50 - Selenastrum capricornutum (green algae) – 0.16 mg/l - 72 h.
Persistence and degradability: According to the results of tests of biodegradability this product is not readily biodegradable

DISPOSAL CONDITIONS
Methods of disposal: Waste must be disposed of in accordance with federal, state and local environmental control regulations.

TRANSPORT INFORMATION
Contact Alomone Labs company for transportation information.

REGULATORY INFORMATION
This safety datasheet complies with the requirements of Regulation (EC) No. 1907/2006.

OTHER INFORMATION
The above information is believed to be correct but does not purport to be all inclusive and should be used as a guide only for experienced personnel. Always consult your safety advisor and follow local and national safety legislation. The absence of warning may not, under any circumstances, be taken to mean that no hazard exists.
